

Explore Photo Challenge week 1. Play with Light

Due Thursday April 9th by 11am

Seek inspiration. Prep your mind for [how artists look at light](#) to make great photo's

Visit [welkaart.weebly.com](http://welkaart.weebly.com) for teacher examples, and videos.

Visit [FCSphotochallenge group](#) for teacher examples and five daily challenges

TAKE A SCAVENGER HUNT – Look for the play of light

- After looking at the resources for ideas. Take a scavenger hunt of sorts looking for examples. Literally --Go for a walk mid day in the harsh sun and look around you, this will give you great shadows!
- Go inside and play with the window light, and side light.
- As the sun sets / rises go outside and try to create a silhouette by placing an object in front of the sun or any light source. Work with low light and a flash light or candle. Download a long exposure setting or app and use moving lights

TECHNIQUES to use with Light-

1. Side light
2. Back Light or Silouhette
3. Shadows
4. Low light. Experimental lights. Try long exposure setting or app.

**ASSIGNMENT REQUIREMENTS DUE THURS 2/02 before 11am (Rubric to be posted on teams)**

1. INSPIRATION Get inspired from others (weebly,pinterest). This small step makes a big difference. Load up on knowledge and see what you can apply

2. PLAN Explore “Play with Light”. 3 Techniques demonstrated off the list or you mastered less choices. Knowledge applied. Don't just click the button. Move around your subject and compose the shot. Get things just right. Don't be one and done

3. CREATION You will have many photos that don't work, but as you kept going for a good composition they got better. Enter your those top 10 Edited (crop, adjust light) photos of the week to [FCSphotochallenge Facebook group](#). Tag photos with technique used (instructions on site).

4. REFLECTION Having done the Give 3 feedbacks on others photos --Do Friday after handed in. Upload on time - by Thursday at 11am. (new project begins)

**Photo Tips:**

- **Move around your subject.**
- **Try a low angle or high angle to view it.**
- **Simplify what we see and make a point with your photo, watch for background distractions.**
- **Zoom in OR put subject off center**
- **Use touch screen to control exposure and focus**
- **Don't use filters on photos**
